

RJM STRATEGY GROUP

PLAN. PREPARE. PROTECT.

CARJACKING PREVENTION

(IN PERSON OR VIRTUAL)

Carjacking crimes have increased exponentially in a short period of time. This type of violence has spread rapidly from the city into the suburbs, increasing the possibility that you or someone you know will be a victim. RJM Strategy Group's Carjacking Prevention training, which is designed for ages 16 and up, is led by instructors with extensive law enforcement knowledge and experience. The session will include group discussion, instruction in carjacking prevention techniques and practice of real-life scenarios that will take place in an actual vehicle to help facilitate the learning process and enhance the confidence of participants.

Participants will benefit from the following:

- Learning the various aspects of situational awareness and how to use them to your advantage.
- Becoming skilled in how to mitigate danger, minimize injury, and increase the odds of survival during a carjacking.
- Developing the confidence and ability to protect yourself (and others riding with you) in a threatening and emotionally charged situation.

TAMBIÉN TEMENOS INSTRUCTORES DE ESPAÑOL.
